EXPERIENCE

Founder

SAU.app | Singapore | 2019 – present

Fully developed web portal (SAU.app) and Applications ("SAU: Task tracker & projects" on the AppStore, Google Play, AppGallery) for personal and team productivity. More than 5.000 users & 120 thousand tasks.

Responsibilities:

- Building a development team (web developers, mobile developers, testers, analytics).
- Keeping SAU architect as one platform with applications and web portal as its parts.
- Planning, managing, and controlling the process of product development.
- Doing recurrent marketing research and keeping the product on track.

Product Owner

PM Practice | Moscow | 2014 – 2018

Fully developed, deployed & implemented Project Management Systems "PM Foresight" to more than 35 organizations for four years with 1bln+ rubles of revenue.

Responsibilities:

- Creating and keeping a road map of PM Foresight.
- Keeping general product architect view.
- Managing development (coders, developers, testers, designers) and deployment teams.
- Planning and monitoring schedule, budget, resources and scope of features.
- Keeping on track development and support of the product with the same quality.

Project Manager

PM Practice | Moscow | 2012 – 2014

Two big Project Management systems for sports events were successfully deployed, configured & implemented (based on SharePoint + Project Server).

SUMMARY

I have been working in various areas of the IT industry for the past 16 years after I graduated from South Ural State University magna cum laude with a major in Computer Science.

I specialize in product management, where I am involved in all stages of product development, from methodology to automation of various information systems. The years of experience in the IT industry and accumulated knowledge of multiple companies' needs inspired me to create an eco-system of web-portal & applications SAU.app.

My startup helps people and teams stay productive with no stress and anxiety.
